

Behind every record, there are years of intensive training and the athlete's desire to produce excellent performances. Behind the result, there is profound know-how and the high precision of Swiss Timing's state-of-the-art technology.

If you have a special interest in technology and you want to participate in the future development of high level sport...we are looking for you!

Globally active, our company is constantly seeking for employees determined to progress and work in a highly innovative environment.

**For our Leipzig office and in close cooperation with our colleagues from our parent company SWISS TIMING located in Switzerland, we are looking for a**

## **Software Test Engineer (m/f)**

### **Job-description:**

You will be in charge of the review of software requirements and use cases. Creation of test cases, as well as providing support in the writing of test cases to internal resources and external consultants will be an important task. You will run tests during various R&D stages (functional testing, integration testing, regression testing, automation tests) and suggest continuous testing process improvement, including test case evolution. You will execute test cases, record and document results, compare them to expected results. Defects logging during the test execution phase will be required, as well as reporting test results to the Test Lead. You will maintain the test cases library in Team Foundation Server Microsoft Test Manager.

### **Your profile:**

- Strong communication skills and team orientation
- Social skills, especially diplomacy and advocacy
- Self-organized, able to prioritize according to deadlines and test campaigns
- Take initiative and have ownership of work, detailed and methodical, efficient working style
- Resilient and able to operate in a dynamic and sometimes stressful environment
- Outstanding technical skills, bring in know-how at appropriate times
- Interest in the sport domain and understanding of the characteristics of the sport business

**Professional requirements:**

- Bachelor's degree in computer science or equivalent
- ISTQB certification (Foundation Level) a plus
- Ideally, 3 years of software testing experience
- Development knowledge would be a plus (C#, .Net framework)
- Practical experience participating in Software Testing Projects and the various testing cycles
- Experience with Automation testing required
- Proficiency with Microsoft Office suite
- Experience with Agile SCRUM methodology
- Knowledge of Team Foundation Server (TFS) and Microsoft Test Manager an asset
- German (very good C1 or mother tongue) and English (very good C1)

You are a team player with distinct communication and conflict management skills? You have an independent and responsible way of working? You are looking for a broad range of responsibilities with a long-term perspective?

**Look forward to:**

- A motivated and innovative team
- Challenging tasks in an international environment
- Contribution and implementation of new concepts and ideas
- Travels to international sport events (max. 10%)
- A permanent contract

Did we catch your attention?

We are looking forward to your application at [human-resources@st-sportservice.com](mailto:human-resources@st-sportservice.com). Please also include your desired salary and the earliest possible start date. Since we work in an international context, we ask you to submit the application documents and the motivation letter in English.

For more information visit our homepage at [www.swisstiming.com](http://www.swisstiming.com).

We will treat your application documents in accordance with the legal requirements for data protection.
